-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 8-11 and 14-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Hawkins et al. (WO 99/02570).

The reference discloses preparation of a supported catalyst comprising silica treated with titanium, followed by contact with tris-pfp boron and metallocene, and the use of said composition in ethylene/hexene copolymerization (Examples 3-5), including all claimed limitations.

3. Claims 1-3 and 10-17 are rejected under 35 U.S.C. 102(b) as being anticipated by McDaniel et al. (US 6,107,230).

The reference discloses in Examples 12, 13, 19-22, 28-35 the preparation of a treated support comprising contacting an inorganic oxide with a transition metal, metallocene, and organoaluminum, followed by olefin polymerization, including all claimed limitations (see also col. 11, line 50 through col. 12, line 20).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over (WO 99/02570).

The parent claim is discussed with respect to this reference above. Missing from the cited examples is the use of gas phase conditions and the use of the metallocene of claim 3. Gas phase conditions are recommended at page 7, lines 22-25, and the claimed catalyst structure is suggested at page 4, providing motivation for one of ordinary skill in the art to use these alternative embodiments.

6. Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberto Rábago whose telephone number is (571) 272-1109. The examiner can normally be reached on Monday - Friday from 8:00 - 4:00.
